

Brief Description	Family Connections (FC) is a multi-faceted community-based program that works with vulnerable families in their homes, in the context of their neighborhoods, to help them meet the basic needs of their children and prevent child maltreatment and out-of-home placement.
FC Core Components	<ol style="list-style-type: none"> 1. Intake & screening 2. Outreach & engagement 3. Concrete/emergency needs assessment and services 4. Comprehensive family assessment (including the use of standardized clinical assessment instruments) 5. Outcome driven service plans with SMART goals 6. Change focused intervention <ol style="list-style-type: none"> a) Minimum of 1 hour per week of purposeful change focused intervention in the home b) Advocacy/service facilitation 7. Evaluation of Change (at least every 90 days after the initial service plan) – including the assessment of change over time using standardized assessment instruments 8. Case closure
Target Population	Families with children (birth to 18) who are at risk of child maltreatment.
Outcomes	Original research indicated positive change over time in protective factors (parenting attitudes, parenting competence, social support); diminished risk factors (parental depressive symptoms, parenting stress, life stress); and improved child safety (physical and psychological care of children) and child behavior (internalizing and externalizing behavior). Agencies replicating FC have demonstrated similar changes in risk and protective factors over time.
Length of Service	The initial service period is 6months, with the option of extending intervention in 90-day increments when outcomes have not been achieved. <i>It is important to note that shorter interventions have demonstrated greater cost effectiveness in the original demonstration and by replicating programs evaluated by a federally funded cross site evaluation.</i>
Staff Qualifications	BSW or MSW under the supervision of an Advanced MSW Clinical Social Work Supervisor. At least one hour of individual supervisory coaching and 1 hour of group supervision are required every week.

<p>Workload/Caseload</p>	<p>Fidelity criteria focus on performance of core intervention components (e.g., at least one hour per week of face to face change focused interventions), rather than a pre-determined caseload size. Individual providers have been more likely to meet Family Connections fidelity when caseloads have not exceeded eight families per case planner.</p>
<p>Overview of General Requirements</p>	
<ol style="list-style-type: none"> 1. Comply with all Family Connections Fidelity Criteria 2. Participate in a Readiness to Implement Family Connections assessment at start up. 3. Ideally, supervisors complete a Building Coaching Competency 2-day course 4. All staff complete the Building Competence for Family Connections Practice hybrid course (partially online and live), all staff complete homework that guides FC practice in all components 5. All staff implement the intervention as outlined in the Family Connections Intervention Manual 6. QI staff build competence in using Qualtrics to support the Computer Assisted Interview and the Qualtrics case review fidelity tool 7. All programs must provide electronic devices (tablets, smart phones, laptops) that staff use with families for the Computer Assisted Self Interview (CASI) required during the comprehensive family assessment and evaluation of change intervention components. 8. Programs agree to participate in data sharing and evaluation. 9. Programs participate in an assessment of fidelity every six months 	
<p>CONTACT Diane DePanfilis</p>	<p>diane.depanfilis@hunter.cuny.edu; phone – 917-453-2296 NOTE: Installation and Implementation Training and Technical Assistance is provided by ACTION for Child Protection</p>

COSTS: We individualize approaches to the size and needs of the program to cover installation, training, technical assistance, implementation support, and fidelity assessment.
